

1.Aero-Tech (Chengdu) Machinery Co.,Ltd

Aero-Tech (Chengdu) Machinery Co., Ltd. is a well-known professional OEM and ODM provider focused on delivering innovative design and high quality manufacturing of golf equipments, golf accessories, and forged mechanical parts and hardware. We have cooperated with brand golf merchandisers global wide over past 5 years by helping them keep their edge in today's highly competitive market. We are fully capable of rapid prototyping, pilot production, short run supply, material advice and support, which enables us to keep improving your current products while make your new products successful.

Our R&D team consists of a group of innovative and experienced professional material and engineering specialists with strong background in the aviation material and engineering industry. They can participate in every stage of the development of your golf equipment. If your products require cost reduction, manufacturing innovation or higher quality, surely we can help.

Aero Tech is the recognized source of high quality and high value golf equipment, enabling our clients to focus on what they do best, while we do what we do best.

Our main products include:

Hot forged irons, hot forged titanium woods and other hot forged products;

Irons and woods with maraging steels clubfaces cobalt alloy clubfaces;

Powder metallurgy products (including W-Cu/W-Ni Tungsten weights in golf clubs);

Hot forged mechanical parts and hardware, etc.

We are sincerely looking forward to communicating and cooperating with you.

Our vision trigger:

"Quality Gains Market, Trust Wins Client".

Our mission:

"Offering forged golf products with high quality and competitive price".

2.Chengdu Drsk Tech.Com.Ltd

Chengdu DRSK Technology Co. Ltd is comprised of talented professional team with many years' experience of design, development, manufacturing and technical services in welding material and technology, special welding & cutting equipment, tooling and fixtures, robotics workstation, and production line systems. The company is committed to provide high-quality automated welding & cutting equipment, special production lines and robotics workstation to Railway, Aerospace, Military industry, Pressure vessels, Automobiles, Home appliances, Engineering machinery, Petrochemical engineering, and Vessel and marine engineering industries. By integrating highly-efficient and precise welding technology, automatic cutting, welding and assembling, logistic machinery, and flexible tooling, we deliver turnkey solutions that include everything from materials and equipment, engineering and project management to installation, commissioning and maintenance. We strive to grow with integrity, professionalism, innovation and win-win cooperation. Consummate technology, prime quality, and perfect service is our constant aim.

3.Chengdu NOVO Machinery Co.,Ltd

Chengdu Novo Machinery Co.,Ltd is a professional manufacturer for power transmission parts and various types of machinery components. As a joint venture of research, production and sales, we have a manufacturing base covering an area of over 20,000 square meters, with a fixed production plant 5,000 square meters, various professional production equipments, such as hobbing machines, drilling-milling machines, grinders, pneumatic hammers, hydraulic broaching machines. We have a producing capacity of 800,000

transmission parts each year. In product quality management system, we had passed ISO9001:2000 since 2003 from China Quality Certification Center.

Our main items including Timing Belt Pulley, Locking Assemblies, Gear, Coupling, Clamping Plate, Torque Limeter, Sprocket, and mechanical products as drawings from customers, has been exported to USA, UK, Spain, Germany, Italy, Poland and other regions and countries.

On the basis of our management principle, To Develop with Credibility, Survive with Quality, high quality, competitive price, prompt delivery can be guaranteed. Novo sincerely hope to cooperate and create mutual benefits with you!

4.Sichuan Huade Precision Manufacturing Co., Ltd.

Committed to never leak technology, well cast model of the quality of the Huade group, is located in Sichuan city of Chengdu province. With the introduction of Germany advanced production technology, manufacturing technology and high automation production equipment, the creation of the "Ward" (HEAD) brand.Beyond the competition, sublimation from innovation, Howard to "fine" based on the "good at production, skilled technical, skilled management specialization, truly professional service to the audience, and create the future in industry. After several years of efforts, "Huade" brand (HEAD) products from Germany, the United States and other foreign experts in technology and quality. The production range of products is expanded to rubber sealing products, plastic products, metal die casting products, metal forging products and so on."Huade" brand (HEAD) products in our spare parts import substitution, plays an important role. Products used in automobiles, household appliances, construction machinery, wind power, agricultural machinery, medical equipment, petrochemical and other industries. Has support in Changan automobile, SAIC, YAMAHA motor, BYD automobile, Midea Group, Dechang group, Matsushita group, Ming Yang Group, Guodian united power, western Petroleum machinery and other well-known host plants; and OEM, ODM etc. are exported to European and American countries.In the

future, Howard enterprise is full of confidence for the future. At the same time, we also hope to support and care for our new and old friends and sincere cooperation with us to create a better tomorrow!

6.Sichuan Shengong Carbide Knives Co.,Ltd

Sichuan Shen Gong Carbide Knives Co. Ltd is located in Shuangliu southwest airport development zone and expanded from Chengdu Siruite tungsten carbide knives corp., ltd. Our factory covers 29000 m², and the building area is about 25000 m², and 300 employees in total. We hold an alloy

production line that from the WC powder to finished alloy tools what includes more than 500 machines.

We have more than 20 years of experiences for the production of tungsten carbide slitting knives, specialize in corrugated board cutting knives and other circular slitting knives. More than half of our knives service to overseas markets. Our corrugated board slitting knives of the brand "Jingrui" won the "technologies innovation awards" of Sichuan. Our knives with excellent quality meet your any slitting machines. Our lithium battery poles cutting blades of the brand "SRT" are very welcome in domestic and oversea market.

Our Goal: Be the most professional carbide cutting and slitting knives manufacturer.

7.Chengdu Tiecheng Precision Casting Co.,Ltd.

Chengdu Tiecheng Precision Casting CO., LTD.(TCC) is located in Dujiangyan City(Chengdu) where is famous as the UNESCO World Cultural Heritage.

TCC was founded in 2004. Today, it is a technology-oriented company with three foundries and three different processes in each.TCC has ISO9001 certificate and sets up good QA/QC system and 8S management system. The products of TCC are at the leading edge with good reputation.

We supply parts for valves, pipeline fittings, machinery, metallurgy, mining, petroleum, automobile and mining industries. we can also be in accordance with the customer's drawings and requirements to produce a variety of high-precision, high surface finish and complex-shaped cavity castings. Dimensionally our castings can meet the tolerance by VDG P690 - D1 or ISO8062 CT4-CT6. The roughness of new casting surface can reach Ra3.2 - Ra6.3. The range of casting's weight is from 3g/pc to 50kg/pc.the maximum length of our parts is 1 meter. We also have our own machining workshop and heat treatment workshop that are both located in our foundry and that offer the best efficiency and coordination

We have following advantages:

- 1, A strong technical team and R & D capabilities;
- 2, Strong competence on inspection ;
- 3, Sustainable energy supply;
- 4, Professional human resources.

State-of-the-art technology, sound management, strict quality control ensure the products of our company to win the satisfaction of customers. Our company's products are not only provided to a number of well-known domestic machinery, vehicle manufacturing enterprises and military enterprises, but also are sent to overseas and exported to Europe, America, Japan and other countries and regions.

9.Chengdu Perfect Machinery Co.,Ltd.

Chengdu Perfect Machinery Co.,Ltd was established in 1994.After development of over 15 years, PERFECT has become a medium-scaled Exporting type manufacturer of the Industry Application Field. Our main business is working as the original supplier and sub-contractor for many world famous Manufacturers and Distributors in the Industry Application Field.PERFECT Machinery is a young, dynamic, innovative manufacturer who oriented to meet customers satisfaction and firmly resolved to win the challenge of global markets, including Power Ttransmission, Motion Control, Drive Design and Transfer Applications.More than 14 years ' running experience represents an idea which translate design into application consulting service which is unprecedented for this field. After China joined in WTO, it's a nice change for PERFECT Machinery to do business with overseas customers directly. With the constant effort, our business has spread from most of countries in Europe, Asian and so forth and formed a well and long-term cooperative relationship with our customers.We invested a great deal of funds in technology to support product quality, logistics, etc. For improving our larger business and the real purpose is to satisfy our customers' need, so nowadays, PERFECT Machinery has invested another large amount of funds again to bring some sets of advanced machines constructing its own factory. We embrace the new and lasting changing technology. Meanwhile we have to work harder than before to earn your trust and get your more business due to the competitions becoming tougher and smarter.Here we want to build a better and more stable long-term cooperation relationship with our clients

whatever existing or potential is and sincerely hope you would invite us to work on your next project.

For more than 14 years of deliberate change, PERFECT Machinery has set up a complete background service system and formed a positive and upward attitude to the customers. No matter the pre-and after –sales service or providing customers with timely, accurate information, we all strive to do our best to make the customers satisfied and get our standard ---- PERFECT.

11.Chengdu Minjiang Precision Cutting Tool Co., Ltd.

Chengdu Minjiang Precision Cutting Tool Co., Ltd. founded in 1992, is a high-tech private enterprise specialized in processing of petroleum drilling bit accessories as well as design and production of hard alloy NC cutting tools and hard alloy wear parts. It mainly produces nozzles, water hole covers, petroleum tube chasing tools, thread milling blades, etc.

The company has passed the certification of ISO9001-2000 Quality Management System. With excellent management team and first-class and stable technical talent, it is devoted to research, development and production of hard alloy wear parts, hard alloy NC blades, petroleum threaded pipe cutters and hard alloy non-standard products, enjoying high reputation in the industry.

Through continuous development, the company has formed complete production line and detection system. It has about 100 precision processing machine tools such as Swiss AGATHON NC peripheral grinding heads, NC

forming grinding machines and optical profile grinders and precision detection instruments such as universal tool-measuring microscopes and projectors. The company has two hard alloy blank production lines and alloy production equipment such as advanced presses and low-pressure sintering furnaces, achieving the technological level and internationally excellent enterprises in terms of alloy material production. It is capable of producing products of different standards according to specific requirements of customers.

The company has built long-term cooperation relation with hundreds of domestic enterprises such as Dongfeng Automobile, Kingdream, Wuhan Steam Turbine and Wuxi Zimulaisi. With independent export right, the company directly exports its products to foreign countries with constantly increasing export value and has basically formed stable international market.

Under the enterprise philosophy of “Pioneering, Innovative, Credible, Pragmatic”, we make close cooperation with customers and provide high-quality products and service for customers wholeheartedly. Welcome to visit or contact us.

12. Chengdu Push Automobile Mold Co., Ltd.

Chengdu Push Automobile Mold Co., Ltd (which is abbreviated as Chengdu PAM) was officially founded in April 2014, which was once an automobile die business unit belonging to Push Die & Mold Co., Ltd with over a decade development. With consummate management process and technical team, and rich market resources, Chengdu PAM is now a specialized die company engaging in the design and manufacture of body-in-white panel die, checking fixture, jig, and stampings.

Located at the Longquan Yi state-level eco and tech development zone of beautiful Chengdu, with current total investment amounting to 600 million RMB,

with over 400 employees, 85% of who have above junior college certificates, with about 50 sets of world-class machining and measuring devices, Chengdu PAM has Chengdu base and Yibin base, in total covering 60,000 square kilometers workshop area. Having passed ISO14000 and TS16949, Chengdu PAM is prompting VDI6.4 system on schedule.

After accumulating over 10 years of experience at automobile die, Chengdu PAM has established over 20 auto die standards, providing full life technical service ranging from product simulation, die research and development, product process design, die project design, die manufacture, online try-out, debug machine variance analysis, die production service, to recovery technology for scrapped die.

With a stable clientele from various sizes of OEMs at home and abroad, Chengdu PAM is engaged in the following products and technical services: panel die, super high-strength plate die, multi-station die, progressive die, high-speed precision stamping die, and etc. Implementing project management system makes the project schedule, cost, and quality under control from the project start to its end, acting as a communication bridge between customers and PAM.

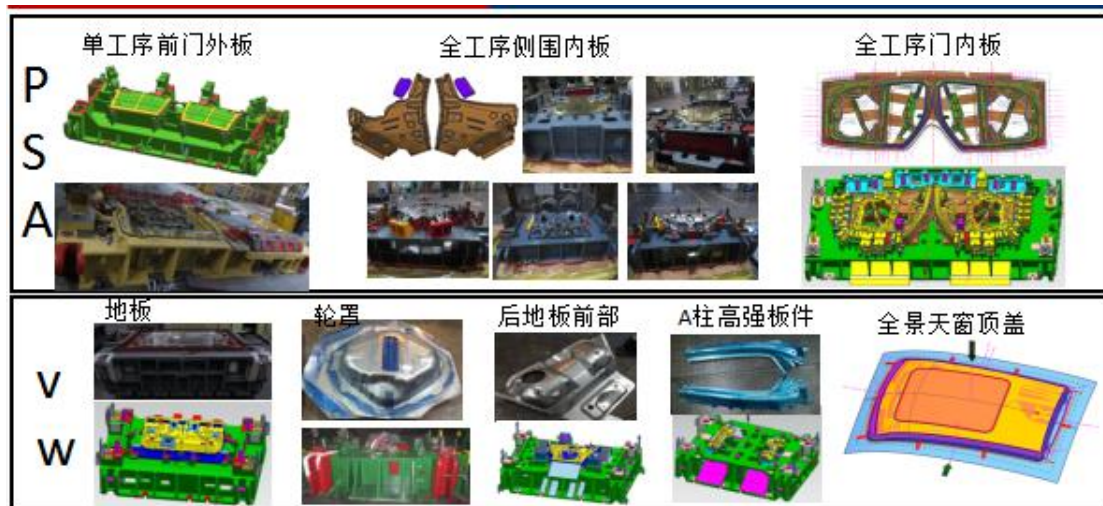

Having been approved by multi OEMs suppliers over the years and won outstanding supplier title, as executive member of China Die & Mold Industry Association, and key enterprise in China, Chengdu PAM is awarded as Quality Credit Enterprise in the China Mechanical Industry in 2015.

We sincerely hope to join hands with friend all over the world to seek development, realize win-win, and create a better future.

14.Chengdu Xinzuan Nano Technology Co., Ltd.

Chengdu Xinzuan Nanotechnology Co., Ltd. (Xinzuan) is a high-tech enterprise specializing in the production of nanodiamond and solving the problems in downstream application of nanodiamond technology. The product of company contain in the whole nanodiamond industrial chain from production to research of application technology, such as nanodiamond powder, nanodiamond engine curing agent, nanodiamond polishing and so on.

In terms of nanodiamond powder manufacturing, our company has set up a large-scale, systematic and specialized diamond powder synthesis, modification and optimized production base. A complete production line for powder preparation, controlled purification, disperses grading, powder modification has been constructed. Our company's detonation nanodiamond powder prepared has reached the world's top level in respect to its grain size, fineness, grain dispensability, and stability.

In the research and development of nanodiamond product, we has independently developed nanodiamond engine curing agent, it is called Runz. From the improvement of lubricating system to the introduction of two-phase lubrication, the invention has not only updated the traditional concept of lubrication but largely saved energy and reduced emissions.

Nanodiamond polishing has been widely used in computer hard disk substrates, computer magnetic heads, fine ceramics, artificial crystal, hard metal, and gemstone. Due to nanodiamond have specialist of ultra-fine and ultra-hard features, our production of nanodiamond polishing could enhanced polishing speed and improve polishing precision.

We are sincerely expecting to cooperate with all friends under the sun!

15.REACH MACHINERY CO., LTD

Incorporated in 1993, REACH Machinery Enterprise now registers its office in a national industrial park, which is located in Southwestern Airport Economic Development Zone, Chengdu, Sichuan Province. Besides the premises of 145mu (about 96,666.7 square meters), the Company set up distribution branches in Shanghai, Shenzhen and Tianjin. In addition, REACH controls three manufacturing enterprises, one trading company and a full-time college.

Over the past two decades, REACH has shifted itself from processing key elements of high-end equipment, to manufacturing key mechanisms of the equipment, then to manufacturing complete set, and its products are supplied to a range of industries, including wind-power, nuclear power, solar energy, aviation, precision machine tool, elevator and heavy hoisting machine, etc. While relying on itself, REACH gives top priority to cooperation with universities, scientific and research institutes and leading players home and abroad.

REACH's development and growth are underpinned by its strengthened corporate culture and core values, as well as intensified loyalty and market exploration. Among others, the Company always highlights its business concepts: to acquire public recognition by serving customers, clients and communities, and to grow and expand by gaining competitive edges in technology, quality and management

Since incorporation, REACH has been upholding a strategy of technology-oriented development, sticking to an overarching principle of honesty and credibility to practice and improve result-and-responsibility-centered administration. Moreover, the Company uses a reliable ERP system to make every decision so as to deliver excellent products and service to customers.

23.Chengdu Hongming Shuangxin Precise Die&Part Co., Ltd.

Chengdu Hongming Shuangxin Precise Die&Part Co., Ltd. was established in July 2000. The company took stock reform in Sep.2007 and the name has been changed to Chengdu Homin Shuangxin Technology Co., Ltd. It majors in design, development, production and distribution of precise toolings and components. It also devotes into research, development and manufacturing of precise parts and components centering on 3C area.

Homin pays great attention to establishing quality system and our quality policy is “to be the best, keep improving and total customer satisfaction”. We actively push forward 5S management and set 6 σ management as our goal.

Our company obtained ISO9001, QS9000 , TS16949, ISO14001 and OHSAS18001.

Our company is honored of “Chinese High-Tech Enterprise”, “China’s key enterprise of precise stamping die ”, “Chengdu Developing and Scientific Enterprise”, “National Torch Plan Chengdu Electronic Information Industrial Base Key Enterprise”, and we also have got national high quality tooling awards for many times. We have been recognized as long-term partner of many well-known enterprises in home and abroad.

Aim at the international first-class manufacturer of precise parts and components centering on 3C area and based on our mission of leading the precise popularity and electrifying happy life, our company will continuously improve ourselves and provide perfect service for customers. We are ready and eager to cooperate with a number of domestic and abroad clients to make wonderful future.

24.Chengdu Honevice Machinery Equipment Co., Ltd

Chengdu Honevice Machinery Equipment Co., Ltd.(HNVC), which is a professional machinery company and approved importer and exporter, has been engaged in products research & development, manufacture & trade for

many years.

The main products of the Company are casting, forging, precision machining, die casting and other mechanical parts, metal materials, and models etc. for exporting, which are widely used to automotive, fluid chemistry, electrical fittings, medical equipment, food machinery, engineering assembly field etc. The products are mainly exported to North America, European Union, Australia and more than other 20 countries and regions.

We are professional in precision casting , sand casting, aluminum die casting , forging, lost foam casting, V method of casting and other processes, which make us quality supplier of Volvo, Bosch, Fiat, Audi and other world known corporations.

With the enterprise idea "honesty supreme, serves first" and the spirit of enterprise "exploration and innovation, commitment to excellence", HNVC will provide you with one-stop service and be your strongest mechanical and engineering parts supplier!

25.Sichuan Chengfei Integration Technology Co., Ltd.

Sichuan Chengfei Integration Technology Co., Ltd (hereinafter referred to as CITC), is a high-tech share-holding company affiliated with AVIC.

CITC Business Unit is principally engaged in the design, development and manufacturing of the tools and dies. Our main products are dies for the large and high-grade outer skin panels such as the body side, roof, doors and fenders for medium and high-grade cars. The tooling and dies products are exported to USA, UK, Germany, Japan etc. CITC became the global supplier for GM, FORD, Land Rover, Audi, Mazda etc. and also established a strong relationship with domestic main automobile manufacturers, such as FAW-Group, Dongfeng-Group, GAC-Group, Chana-Group, etc.

As one of the largest automobile skin panel die maker companies in China, CITC is equipped with over 60 large and advanced NC processing devices as well as testing and commissioning equipment and passed the ISO9001 and VDA6.4 QS certificates. CITC has the ability to manage the die design, manufacturing and overall project coordination for the whole automobile skin panels and CITC is also at the leading position for die design, manufacturing technology in automobile die industry in China.

27.Chengdu Aerospace Fenghuo Precise Mec. & Elec. Co. , Ltd.

Chengdu Aerospace Fenghuo Precise Mec. & Elec. Co. , Ltd. is located in Chengdu China. Its traffic is convenient for aviation, railway and motorway. It benefits from Chinese government's policy of western development, so it has excellent environment. The product development and production are mainly involved in the field of aerospace, aviation, nuclear, chemical industry and so on. In order to better meet customer needs and ensure high quality of products,

the company not only has received the Quality Management System Certificate ISO9001-2000 in year 2005, but also has received the Quality Management System Certificate of National Military Standard in year 2013. It has been approved as High & New Technical Enterprise of Sichuan Province in Oct. 2015.

More than 20 years , the company is good at mechanical and electrical integrated products, non-standard equipment, industrial robots, manipulator, hydraulic damper for high speed train, etc. Its products such as centrifugal machine, vacuum tester, hydraulic testing platform etc sell well at home and abroad. Manipulator special made by the company has won “National second class award of new scientific and technical products.” and gold award in “Year 1995 Exposition of new products (Chengdu) ”. hydraulic damper for high speed train has passed test by quality test center of Railway Ministry, it is in accordance with Standard TB/T1491 - 2004, it has gained national patent.

30.Chengdu HTLL Electronical Equipment Co., Ltd.

Chengdu HTLL was established in April, 2008, located in the beautiful Green

Park in Qingyang District, Chengdu. It is a diversified enterprise engaged in communications, networking, sheet metal products manufacturing of electronics industry, CNC machinery equipment manufacturing and selling, and has a high-quality technical and management team with rich experience in R & D and designing sheet metal products, communications equipment. On the basis of business philosophy --“ give full scope to the talents, turn material resources to good account ”, HTLL has survived in the rigorous financial crisis environment and achieved great developments luckily , and we will strive to provide the top quality products and the considerate services to all the customers.

HILL's main products include: FTTH fiber home products, FTTN outdoor integrated cabinet products, FTTB multimedia integrated wiring box products, the traditional series of wiring products - fiber patch panels (ODF), digital patch panels (DDF), cable transfer box, cable connector box, cable terminal box; cabinet products --- integrated wiring cabinets, network cabinets, outdoor cabinets and other communications accessories and processing supporting products.

In order to ensure the R & D and production quality of the company's products and improve the market competitiveness of the products, the company was the first to bring in the most advanced cabinet sealing dispenser in the south-west region, and has the most advanced German CNC punch press, as well as the domestic advanced plate material bending machines, cutting plate machine, and other sophisticated sheet metal processing equipment. Relying on the efficient management and large amount of production, HILL has realized its philosophy of “Quality determines the market and service casts the brand”.

Chengdu JING LIANG GONG FANG Technology Co.,Ltd.

The Trustworthy Supply Chain Integration Partner

Chengdu JING LIANG GONG FANG Technology Co.,Ltd.

BESTEXTRA has been committed to advanced lubrication and providing cost effective products and technical services. We have all-around products applicable to all kinds of harsh operation condition, including high temperature, long life and corrosive conditions. We produce vehicles and auto parts, bearings, heavy production equipment etc.

» Development and Technical Support
We have cooperated with Chinese Academy of Sciences and Huazhong University of Science and Technology for years, and have formed a team integrating doctors, masters and senior engineers with rich experiences in development, production and application of special lubricants. We also cooperate with other scientific research institutions and overseas advanced vendors to achieve information interaction.

» Production Equipment and Technology
We have 100,000-scale purification plant, stainless steel agitated reactor and reconciliation kettle that can control the electrical heating oil heat furnace precisely, vacuum degasser and TOMPA homogenizer. We have developed micro positive pressure saponification technology and high precision filtration technology to ensure higher product quality.

» Detection and Testing Equipment
Our company is fully equipped with lubrication testing equipment and professional testing personnel, including: kinematic viscometer, penetration testing and thermostat, drop detector, automobile hub bearing grease leakage detector, lubricating grease water resistance tester, oxidation stability tester, low temperature torque tester and vane shear tester etc.

31.Chengdu CAIC Electronics Co., Ltd.

Chengdu CAIC Electronics Co., Ltd. (hereinafter referred to as CAIC) is a member company of AVIC, belonging to the Avionics section, and is a backbone company in the R&D and manufacturing of air data systems, aviation integrated data systems, wireless data transmission systems ,Landing Gear Control system, Fuel Boost Pump and other avionics and transducers.

With strong R&D and manufacturing capabilities, CAIC had developed the first digital air data computer and the first high pressure high precision mini-size vibration cylinder pressure transducer in China. It is the only company in China who masters three-axis air data system for helicopters. Meanwhile, CAIC is capable of developing & producing air data pressure standards test facility and high precision air data test systems.

CAIC establishes a complete quality management system with accordance to GB/T19001-2008, GJB9001B-2009 and AS9100C standards, which is

certified accordingly and passed the quality audit from the military customer as well. Chemical process and aluminum alloy fusion welding are certified with NADCAP. Air data systems, as well as several other products, are awarded with CTSCOA from CAAC.

Adhering to the company mission of “providing competitive products to the defense, creating the wealth to the society, bringing profits to the shareholders and employees” as well as the management concept of “continuous quality improvement; heart and soul services; lean management; beautiful environment”, CAIC is constantly developing its core technologies and proactively responding to the changeable market, maximizing customer’s value and striving for further development.

Chengdu Lianyu Precise Machinery Co., Ltd. was established in 1997. The Company has been committed to creating the best value for the customers adhering to the principle of “innovation first and honesty based” since the

establishment. Lianyu company is dedicated to the molds design and manufacturing for beverage & food packaging.

Its main products are PET perform, injection & compression cap, bottle and thin wall packaging mold. With rich experience and strong technical support, Lianyu company has been expanding the business constantly in global market. With the professional knowledge and experience, we supply the most competitive products and efficient service in your whole production process.

Over the years, Lianyu has been focusing on the global latest mold development and introducing abundant advanced technology. During the communication with customers closely, we always provide strong support to our customers after meeting the challenges one by one. We also ensured our another manufacturing base, Suzhou Liankai precise mould Co., Ltd, to put into operation successfully in 2014, which not only can help us to improve greatly in the professional technology, but also give us the infinite power in service fields.

With innovative ideas and high precision production technology, Lianyu offers high-performance mold and production solutions to aim to create the most important value for the customers' requirements. No matter how hard it is, Lianyu will help you achieve the greatest value.

33.Chengdu Aluminum Expert Technology Co.,Ltd.

Chengdu Aluminum Expert Technology Co.,Ltd.(hereafter referred as AL Expert)was founded in March, 2016 by Mr Zhanglei who has specialized in sales of industrial aluminum products for more than 12 years and got strong support from his colleagues. Based on the traditional way of purchase and order, AL Expert built a whole database system showing the real-time stock of the main domestic industrial aluminum manufacturers so that it can provide the customers with professional, simple, direct, quick and comprehensive online and offline purchase experience.

The traditional order and purchase way of Aluminum products has to be changed gradually based on the rapid development of the E-commerce and the idea of internet plus proposed by the government. The AL Expert team, who has specialized in the field for many years, has rich experience in AL product sales and a very good understanding of the manufacturers, which ensures the efficient supply of our data system. Meanwhile, we have good cooperative relationship with the purchasing enterprises and agencies. Moreover, AL Expert has a consultant team consisting of several experts and technicians who have worked in the top 3 Aluminum manufacturers for more than 30 years. The AL Expert Tech.Center also focuses much on the research work on the application of aluminum alloy material. Therefore, supply, technology and marketing are the strong base of AL Expert.

Sichuan Ruifeng Forging Co., Ltd., founded in the late 1980s, located in Chengdu Bailuo industrial zone in Sichuan province, which has a distance of more than 20km from the center, covers an area of 26666 square meters with a fixed assets of more than 30 million yuan. The company has a staff team of more than 100 workers, 2 professional engineers, 6 normal engineers and more than 10 technicians. Ruifeng is a specialized forging enterprise focusing on the production of automobiles, high-speed rail, wind power, mining, petroleum and construction machinery forgings and is also a member of China Forging Association.

The company has a sound quality control system and has obtained TS16949:2009 and ISO9001-2008 certifications, with testing equipment of a hydraulic universal material testing machine, a semi automatic impact testing machine; a Rockwell hardness tester, a Desktop Brinell hardness tester; 4 infrared thermometers; a set of ZY-CX1 Computer infrared multi-element metal material analyzer etc. It is able to achieve the analysis on steel, forging blank ultrasonic testing, fluorescent magnetic particle testing, physical and chemical, metallo graphic, mechanical properties testing and effectively control the whole process. The forging quality can meet or even exceed the international level.

The company established a long-term cooperative relationship with many domestic famous enterprises such as: the domestic Chengdu Feiya crankshaft Co. Ltd, Sichuan Feiya crankshaft Co. Ltd., Dongfeng Yulon Automobile Co. Ltd, FAW Guiyang branch, Chengdu engineering machinery Limited by Share Ltd, Shanghai Dragon Machinery Manufacturing Co., Ltd. and also has a good business relationship with some famous companies in the US and German.

35.Chengdu Shangming Industrial Co.,Ltd

Chengdu Shangming Industrial Co., Ltd., located in a national economic and technological development zone (No.6, Lingchi Street, Middle Xingguang Road, Longquanyi District), was established in 1989. The company is specialized in design and manufacturing of semiconductor plastic package moulds and automated die-cutting & shaping system with an area of 25 mu and 140 employees. With the development for over 20 years, it has become an integrated company of development and manufacture and formed a diversified operation mode. It was awarded ISO9001:2000 quality system certificate in 2001, and has been awarded as “hi-tech enterprise” by Science & Technology Department of Sichuan Province many times since 2003.

The company is committed to the research and development of semiconductor plastic package moulds and automated die-cutting & shaping system, and constant innovation, speeding up the product updating and improving the product technology content to ensure its leading position in the domestic packaging mould field. It has seized the opportunity of China's entry into WTO and strengthened cooperation with domestic colleges and universities and international advanced packaging enterprises, and enhanced the competitiveness of enterprises and the international market share. It keeps growing with the development of microelectronics industry.

Chengdu Shangming Industrial Co., Ltd. has dozens of domestic and overseas precise production equipment and can meet the demand of multiple products.

EDM W/C (Swiss Charmille), jig grinders, optical contour grinders (Japanese WAIDA with a main function for grinding the special-shaped curved surface), CNC machining center (Taiwan), Sodick EDM (Japan), precise shaping grinders (Japan and Taiwan), precise high speed machine (carving precisely) and checkout equipment: universal tooling microscope, precise profile

projector, NIKON height gauge (Japan and Suntront), vacuum heat treatment, liquid nitrogen cryogenic treatment (key process) and other equipment.

36.Sichuan Shenghua Power Technology Co., Ltd.

Sichuan Shenghua Power Technology Co., Ltd. is a high-tech enterprise specialized in R&D, manufacturing and marketing of high performance modular power converters and power conversion solutions. It's main products are DC-DC modular, AC-DC modular, customized power system, etc.

The Company has a batch of high level professionals full of vitality and with spirit of innovation. After years of accumulation, the power supply products developed and produced by the Company have reached domestic and overseas leading level and are characterized by their high reliability, high power, high efficiency, high voltage input, wide range, multiple output, etc. and widely used in military, communication and industry fields.

At the beginning of establishment, the Company set its mission of “putting the professional high-tech power industry of China at the leading position in the world”, vision of “to become benchmark and fulfill dream”, and quality policy of “scientific and technological innovation, reliable quality and sincere service”. It has got the certification for scientific research and production permit of weaponry, new era national military standard GJB9001B-2009, national standard GB/T19001-2008 and other quality management systems.

Quality is the eternal theme of enterprise. Without quality, an enterprise will not have a future. With all staff participation, the Company has strengthened

its management and keeps improving to create good quality. The future success belongs to the leaders in respect of high quality which is also the mission of Shenghua.

Founded in 1965, Chengdu Xuguang Electronics Co., Ltd. has developed into one of the largest manufacturers of producing ceramic-metal electro-vacuum devices. Our company is one of the 500 largest enterprises in electron and communication equipment industry and has passed the

evaluation of ISO9001 quality system certification as well.

Our company is located in East Industrial Zone of Xindu, Chengdu City, Sichuan Province with a staff of over 1100 employees. Our total assets amount to over USD217 million. In 2016, we manufactured and sold over 350,000 pieces of vacuum interrupters inland and the sales volume is over USD130 million.

Our company has a long history of producing electro-vacuum devices which cover: Ceramic-Metal Transmitting Tubes, Ceramic-Metal Vacuum Interrupters and High & Low-voltage assemblies of distribution apparatus and electrical appliance element.

Over the past 51 years of hardship and experiences in the production of electric-vacuum components, Xuguang gets fully developed and it now has grown into one of the most important enterprises in China which integrates in the production and sales of metal-ceramic microwave triodes and tetrodes, high power transmitting tubes for radio and televisions, metal-ceramic vacuum interrupters and high and medium voltage power distribution units.

44. Sichuan YOTO Rubber & Plastic Engineering Co.,Ltd.

Are you looking for top-quality and worth-your-dollar rubber products? Then, YOTO is your right choice!

Located near the Dujiangyan Irrigation System, a world cultural heritage in Chengdu, Sichuan, China, Sichuan YOTO Rubber & Plastic Engineering Inc.(YOTO) is a sizable research-led and market-oriented manufacturing enterprise of rubber products. Its major products, well-known nationwide, are the rubber airtight pressurizing and sealing products used on the breaks, and steering systems of automobiles and motorcycles as well as on house appliances.

Early in 2001, YOTO gained the International ISO 9001-2000 Quality Management System Authentication. Later, it received the certificate of Quality Trusted Unit by Sichuan Provincial Bureau of Quality Tech Supervision. In 2005 and 2006, YOTO earned the Super Quality Product Certificate by China Heavy Auto Group, and since then it has become a strategic partner of the latter.

45.Sichuan COSMOS Precision Mold & Die Co., Ltd

Sichuan COSMOS Precision Mold & Die Co., Ltd (COS for short)., registered in March 2004 with a registered capital of RMB 15 million, mainly deals in the design, manufacturing and marketing of precision molds and mold parts as well as the production and sales of related electronic products. The company is located in Chongzhou Huixing South Road Industry Zone.

Cos now has more than 100 sets of major equipment, including a lathe, six vertical millers, 23 Taiwan Wangpan and Zhunli grinders, six Switzerland Archie and Charmilles precision CNC low speed wire cutting machine tools, 15 Switzerland Charmilles and Japan MAKINO precision EDM machine tools, eight Switzerland MIKRON and Japan MAKINO precision high speed milling

machining centers, 18 Japan Fanuc injection molding machines, and 16 Wenzel CMM and Marriott profile projects. So far, Cos has invested in fixed assets for over RMB 80 million in total. It has successively passed the certifications of ISO9001-2008 Quality Management System and ISO/TS 16949:2009 Environmental Protection system and obtained the title of High-tech Enterprise. In addition, the company has become a membership of Chengdu Die Association, China Mould Association, Sichuan Import and Export Chamber of Commerce successively.

Cos currently has more than 200 employees, of which the key employees are all excellent talents from large multinational group companies , well-trained and have rich mold processing concept and production management experience. All the employees engaged in manufacturing and processing have received strict skill training and systematic training on mold knowledge. At present, employees of Cos who engaged in processing and manufacturing all graduated from Mold and Manufacturing major, which makes them have a strong theoretical basis knowledge and are very clear about the machining, process flow also usage, performance and technical requirements of mold parts in the industry. they can ensure the precision and accuracy of parts processing and keep the precision processing of mold parts within 3u.

Cos has first-class mold manufacturing and testing equipment, and embeds a strict production management mechanism. Currently, it is equipped with a whole set of precision measuring tools to ensure the quality of each outgoing product.

The main customers of our company are Fortune Global 500, which are all famous companies from Europe and American, South Asia and Taiwan.

Relying on mature processing technology and a diligent working attitude, all employees of Cos strive to provide you the best products and service.

46.Chengdu Aerospace Mould& Plastic Co., Ltd.

Chengdu Aerospace Mould& Plastic Co., Ltd. was established on 21st, Dec. 2000 after an enterprise restructure and is affiliated to China Aerospace Science and Technology Corporation (CASC). We are a high-tech enterprise that professionally engage in the R&D and manufacture of automobile components and have a total asset of RMB 2.8 billion. The headquarters of our company is located in the Aerospace Industrial Park of Chengdu economic and technological development zone. We have 22 production bases in northeastern China, north China, central China, eastern China, Chengdu and Chongqing. The major products cover the interior and exterior trim assemblies, functional parts and injection moulds for automobile components.

So far, we have built 2 provincial technology centers in Chengdu and Qingdao, 1 national qualified testing center and an R&D team with over 300 intermediate or senior experts. We own over 50 production lines for various products and different types of world-leading equipment for painting, injection and precise machining.

Through 30 years of technology accumulation and independent innovation, we are able to develop new car types with OEMs simultaneously and have mastered the R&D and manufacture capabilities of bumper, instrument panel and door panel assembly. Our technologies for bumper painting, bi-plastics injection, mouldflow analysis, etc. are leading in China. We took the lead to develop plastic intake manifolds, wheel covers, fuel rails, sound insulation pads, etc. in China, pushing forward the localization and sustainable development of Chinese automobile industry. Some of our products are favored by OEMs in Europe and the USA, which are leading us to step into the international market. In addition, our company participated in several national basic scientific research projects, which boosted the science and technology development of our nation.

We always adhere to our quality policy –“Elaborate planning, strict control, continuous improvement, customer’s satisfaction”. With our perfect quality management system, excellent quality management level, high quality products and favorable credit, we have become the long-term partner or best supplier for over 10 OEMs, for example VW, GM, TOYOTA, etc. We are awarded as “An enterprise that honors contract and abide by credibility” and

“Top 100 enterprises in Chengdu” for years.

During the strategic opportunity period when the automobile industry is developing fast and the Chengdu-Chongqing economic zone and Tianfu New Area are under construction, we, as a key enterprise of CASC intechology application, will always take the responsibility of promoting and developing Chinese automobile component industry. Moreover, we ' ll insist our “people-oriented” policy as well as our business philosophy–“Dedicated & professional, lean and fine, practical and high-efficient, aspiring and excellent”, respect domestic economic regulations and international rules, exert our powerful R&D capability accumulated over 30 years, display our technical and managerial advantages regarding quality and reliability, further explore our potential, innovation mechanism and capability, to finally achieve our vision of “to become a world-leading automobile components enterprise”.
